

THE GREEN LINE PROJECT

LET'S GET THE DUNG OFF OUR ROADS!

YOU CAN HELP BY REPORTING ANY SPILLS.

If you ride in rural areas you'll know that June and July is 'gypsy' season, a time when large numbers of stock are shifted from farm to farm. This means you're likely to come across a whole lot more dung on the road.

SAY NO TO '1s' AND '2s' ALL OVER YOU.

Apart from the effluent mist on your visor, and soiled gear that needs replacing, effluent spills can cause you to lose control of your bike while cornering.

HERE'S WHAT YOU CAN DO.

1. Text 'DUNG' to 244 and we'll call to grab a few details OR
2. File a report on our website in less than a minute, visit: www.motonz.org.nz

It's not about dobbing in farmers or truck drivers – it's about helping the government's National Stock Effluent Working Group identify problem areas that need attention.

MOTO NZ is funded by the \$30 motorcycle levy on your bike registration. We're serious about clearing the roads of all kinds of hazards so you can be safer on two wheels.
